

AIR TRAFFIC SIMULATION AND VOICE TECHNOLOGIES

Online ATC Learning Platform Enabling Part-Task Training Anywhere, Anytime

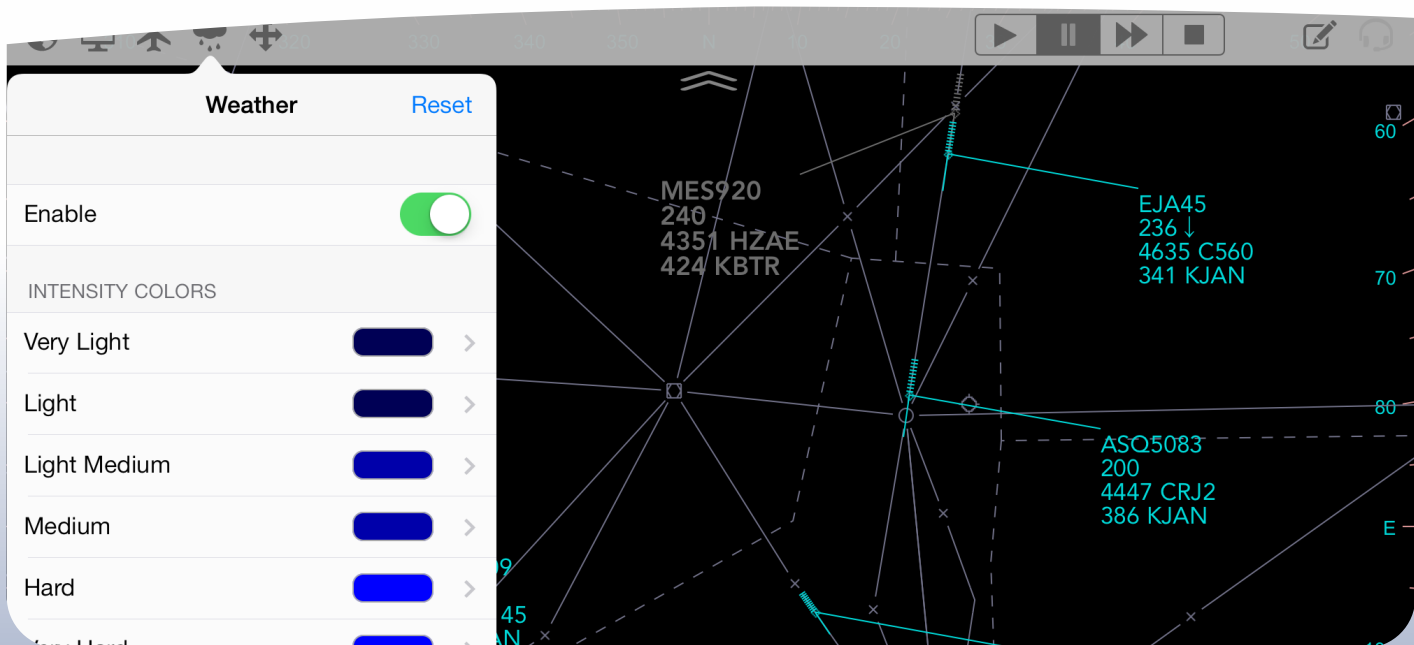

ATCloud allows organizations to maximize their training impact by giving students access to their simulation exercises outside the classroom or lab. This accessibility allows students to learn in the comfort of their home in a no pressure environment and encourages more productive experiences in traditional labs.

ATCloud system consists of:

- Server configurable for closed intranet or open internet on commercial cloud
- Portable devices ranging from iPad, Microsoft Surface, and/or laptops

Features and Benefits

- Accessible on laptops, tablets, and mobile devices
- Includes UFA's acclaimed ATCoach Radar Simulator and ATSpeak Phraseology Trainer
- Runs on the Internet, Enterprise Intranet, or local servers
- Comprehensive class, student, and exercise management tools
- Exercises and databases can be shared with fixed-base versions of UFA products
- Quickly and easily identify problem topics for individuals and the entire class to effectively target instruction
- New way to deploy ATC training software across the enterprise

AIR TRAFFIC SIMULATION AND VOICE TECHNOLOGIES

Use Cases

- Part-Task radar and voice communication training
- Phraseology introduction and practice
- Radar simulator training
- Self-paced reinforcement of training objectives
- Assessment and test taking tool
- Applies to:
